Tohoku University Agriculture Department International Student Association was created with the mind of improving the quality of life for international students in our campus. Despite of being in the same department, many remain in the relationships only within their own research laboratory or ethnic groups. We believe that more active interaction within the various communities will definitely improve many aspects of student life. Therefore, we try to tackle these issues by forming a more comfortable and friendly environment for all students in our department.

In order to achieve this, we plan to organize activities that can fall into three categories, which are:

1. Academic: Guest lecturers, cultural classes, news discussion, etc.
2. Social: Tours around Sendai city, BBQ party, movie night, etc.
3. Practical: Alumni talks, part-time job introduction, job-hunting, house-hunting, multilingual practice, etc.

- Be involved in planning events!
- Support your fellow agricultural students/international students!
- Participate in bi weekly meetings and group discussions!

Contact the Chair, Jun Howard, zinax777@gmail.com for more information about this opportunity.
