

Dr. Craig Hamilton Warden

*Professor of
Pediatrics, Physiology and Genetics,
University of California at Davis*

UC DAVIS
UNIVERSITY OF CALIFORNIA

Venue: Lecture room No.2

24th (Fri.) July

8:50 – 10:20

Human energetics: How metabolic rate is controlled by genetics, weight loss and exercise.

10:30 – 12:00

Connections between the brain and adipose tissue: How the brain controls obesity.

7th (Fri.) August

8:50 – 10:20

Genetics of obesity in animal models: Stories from mice and chickens.

10:30 – 12:00

Examples of genetics and diet interactions: Milk and alcohol tolerance.

13:00 – 14:30

Obesity genetics.

(These lectures are included in Class 2(2) of International Food & Agricultural Immunology Lecture, 2015 and are also highly recommended for Master course students)
