

Dr. Richard Omidwura

Senior Lecturer (Nutritional Biochemist and Phytochemist),
University of Ibadan, Nigeria

This workshop is designed to enlighten livestock farmers, extension officers, agribusiness professionals, and other stakeholders on the critical role of high-quality feed in maximizing animal productivity, profitability, and sustainability.

Feed accounts for up to 70% of the total cost of animal production, and its quality significantly influences growth performance, health, and economic returns.

Boosting Animal Production: The Power of High-Quality Feed in Enhancing Productivity
